

## **Record C (Cartographic data)**

Record C is regarded as any cartographic data attached to Record A or Record B: topographic map copies, orthophoto maps, cave survey superimposed on a topographic map, access sketch, etc. Enclose these data if necessary, especially if finding the cave is difficult. There is no specified form, however, you should always mark the cave name, your name, organization, date, and registry number if known. The form for Record E can preferably be used. Naturally, an appropriate symbol should be placed on the map to indicate the cave entrance.
